

Information for Juniors/Seniors regarding partnership with Wilkes Regional Medical Center

The Wilkes Regional Medical Center has graciously offered a wonderful opportunity for students interested in working with the hospital for their graduation project. There will be a two-day “Healthcare Challenge,” where students will be able to fulfill fourteen hours of the fifteen hour requirement. Students will then need to expand their learning with an additional activity or application of their choice. (This could include—but is not limited to—interviews, community service, or creative project, etc.) Students who have completed the challenge in the past have truly enjoyed their experience. Students are able to shadow different areas at Wilkes Regional Medical Center. Only fifteen applicants, from five different schools, will be allowed to participate.

The tentative dates for this are:

Orientation: November 2nd, 4-5pm

Shadowing dates: November 8th and 9th, 8:30-3:30pm

First priority will be given to seniors; however, if there are juniors interested, please turn in an application. See Ms. Hughes for an application, and return those immediately to her.

Due date for application has not been set, but will be on the announcements.
